2. Positioning

2.1 Problem Statement

The problem of	Videos storage
affects	Admins and uploaders
the impact of which is	Video store is not rich
a successful solution would be	Use google drive with a university-issued student account for unlimited video storage

2.2 Product Position Statement

For	the product is for most people but the appropriate age segmentation in the product
Who	entertainment
The (product name)	is an entertainment website
That	can watch the latest videos without going to the theater
Unlike	other websites will force customers to pay money first before they can experience the copyrighted video
Our product	unlike other websites, copyrighted videos will be viewed at the first minute so that customers can evaluate whether the video is suitable for them, don't like it, spend money to register for a vip account, and other videos will be fine.

3. Stakeholder and User Descriptions

- This section describes the users of the video web. There are 3 types of users of the web: the administrators, the viewers, and the uploaders.

3.1 Stakeholder Summary

Name	Description	Responsibilities
Development team (Group09)	Product code and data processing	UI design; FE, BE of the website; write documents (vision documents, project plan, SAD, meeting reports...).
Theory lecturer (Nguyen Thi Minh Tuyen)	Lecturer provides knowledge and advice	Teach Group09 software development processes.

Video web	Version: 1.2
Vision Document	Date: 10/07/2022

Project mentor (lab teacher) (Ho Tuan Thanh)	Project mentor provide methods to guide project development	Provide template documents, teach us software development architecture. Help Group09 to improve documents, product. Provide interesting functions and lead the project to the best outcome.
Nguyen Huy Hoang (20127168)	Person who likes to watch videos on our website	Provides some new ideas for the extensions. Introduce new utility functional requirements that enrich the web.

3.2 User Summary

Name	Description	Responsibilities	Stakeholder
General user	Those who do not register for an account	Watch videos	self-represented
Vip user	Those who register for a VIP account	Enjoy the benefits of General user and can comment, rate videos, upload videos and recommend new videos to Admins	self-represented
Admin	System and user management	Manage the interface; browse videos that users recommend; browse videos that users upload; manage user information	self-represented

3.3 User Environment

- Our project is a non-profit project so anyone using a device has internet access, and most young individuals; individuals aged from 13 to 35, have a love for videos can watch videos on our website.
- At the moment, our website is supposed to run on browsers (chrome, firefox) with Windows 10, 11 operating system. There is no requirement to use our website.
- The initial release of Video web will be limited to Group09. Later releases will be used on representation (PA06).

3.4 Summary of Key Stakeholder or User Needs

Need	Priority	Concerns	Current Solution	Proposed Solutions
Help users can watch their favorite videos on the web	high	Because watching videos on TV is quite inconvenient and requires a DVD player and DVD disc	People often use television or go directly to the cinema to watch videos	As long as the computer has an internet connection, users can watch their favorite videos at home

Video web	Version: 1.2
Vision Document	Date: 10/07/2022

Upload video	high	The demand for watching videos is great, but video sharing is still limited	To share their videos, users must go directly to the place they want to share (shared videos are recorded on a storage device). So sharing videos as well as finding other videos is very difficult and limited	video lovers can easily share their videos at home and easily enjoy other shared videos.
Recommend videos	high	Everyone has a preference for watching different types of videos, so it is necessary to have a function to express their preferences.	Users can only search for new videos through advertisements in theaters or through referrals on the street	The automatic recommendation keeps users updated with new video information continuously and not to miss their favorite videos
Comment	medium	After watching a video, viewers can rate that video according to their perception as good or bad so that other users can know their point of view and decide whether to watch the video or not.	Viewers give their opinion on videos with just words or personal comments to the cinema	Everyone can make their own comments about the video publicly for others to reference and debate
Download video	low	Some users can download a video they love to their device for the case when they can't connect to the internet but can still watch the video or because of their other needs.	Viewers record videos on the website using mobile devices or other recording devices	Users need an internet connection to download videos from the website to a local storage device

3.5 Alternatives and Competition

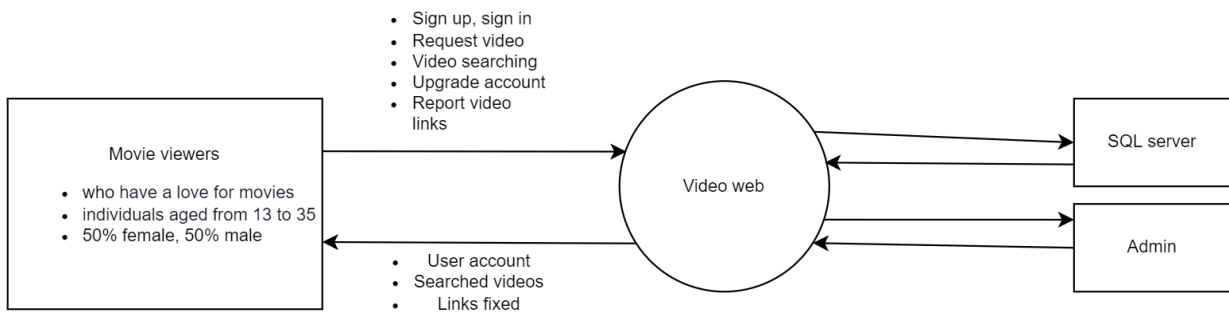

- Netflix is an outstanding project. They support videos with 4k resolution and dolby atmos sound (theater sound technology). Besides, their videos have previews to present content of the film.

4. Product Overview

- This section provides a high-level view of the Video web and block diagram to give overview system description.

Video web	Version: 1.2
Vision Document	Date: 10/07/2022

4.1 Product Perspective

4.2 Assumptions and Dependencies

- The site runs 24/7
- Responsive web (can open on PC and mobile without broken interface)

5. Product Features

5.1 Log in/sign up

The user must provide an account name and valid password to register the account. Account name and password will be changed after.

5.2 Watch video

Users can watch videos even if they are not logged in (but will not save video history)

5.3 Search video

Users need to enter information related to the video, or hashtag, the registrant named web will list the videos available on the web that the user needs to find.

5.4 Like video

The user can like videos and review their favorite video category later. Likes help gauge a video's credibility (videos with more likes are recommended more).

5.5 Save liked videos into individual list

Allows users to create video categories according to their preferences for easy classification and search.

5.6 Download video

Users can download videos from the website to their computers so they can watch videos even without an internet connection.

5.7 View history

Watched videos will be saved in a category, users can search for previously unfinished videos quickly.

5.8 Video upload history

All information videos (name, posting date, genre,...) will be saved in the historical subscription video category so that users can review the details of their video posting work.

5.9 Video comment

You are used to reviewing each video and discussing the content together.

5.10 Post video

Allow users to upload videos.

Video sources will be divided into 2 types:

Show poster's name is the site.

Show poster name is the video provided account name.

Video web	Version: 1.2
Vision Document	Date: 10/07/2022

5.11 Edit, delete video

Edit the video describing the information after posting or delete the video if necessary.

5.12 Hide, show video

Users who post videos can choose to show or hide the video anytime they want.

5.13 Edit profile

The establishment using the information must include name, address, phone number, or email. All information can be edited at any time.

5.14 Report video link error

Each video has a report for feedback about unplayable video links. This report will be sent to the user register and web admin, then they will check the video again.

5.15 Manage interface

Admin will choose easy-to-see interfaces with suitable colors for viewers to feel comfortable with the website.

5.16 Video censorship

Videos from users who do not want their names displayed will be checked by the administrator before being uploaded to the web.

5.17 Moderate users who want to post videos (uploader)

These users will submit a request to be free to post the video. The administrator will check the safety of this account, and if it is ok, will allow this user to post videos. These videos will show the source as the person himself.

5.18 Video suggestions

New videos or many likes and views will be prioritized for nomination. Videos of the same genre as the videos users watch often will also be suggested regularly.

5.19 Account management

Allow statistics, check and manage the list of accounts, block, and top uploader.

5.20 Search video (for video censorship)

Admin go to the censorship section and search for videos that are in the queue that need to be censored

5.21 Individual list (for video censorship)

Admin creates a list of uncensored videos (like youtube playlist)

6. Non-Functional Requirements

- Users can access images, audio, and video.
- Website accessible 24/7 (except during maintenance).
- When paying to upgrade an account, ask the user to reconfirm the password.
- Security of user information (encryption of user input).
- When you forget your account access password, you can request a link to change your password to your email or phone number.
- The maximum search speed is 10s, if it can't load, it will report a page error.
- Compatible with many mobile devices.
